get-live-weather  | React, JavaScript, HTML, CSS, Tailwind, GeoDB API

03 2023

- Built a weather app with real-time updates, serving data of over 700,000 cities from all over the world.
- Implemented real-time updates (temperature, humidity, wind speed) and city search functionality, using the GeoDB API for accurate city information.
- Improved application performance with a responsive and intuitive design, leading to a 25% reduction in API response time.
- [See Live](#)

Portfolio Website  | HTML, CSS, JavaScript.

07 2023

- Designed a portfolio site with minimalist UI elements, including a navbar, sections, and a clean layout.
- Ensured 100% responsiveness across various devices using CSS media queries.
- Integrated contact forms, leading to a 15% increase in client inquiries.
